	Name (Print or Type) _____	Title _____	
	Signature _____	Date _____	

This permit is subject to the following conditions:

1. This permit is revocable, or subject to modification or change at any time, pursuant to applicable regulations, when in the judgement of the Department of Environmental Protection the State of New Jersey such revocation, modification or change shall be necessary.
2. The issuance of the permit shall not be deemed to affect in any way any action by the Department of Environmental Protection of the State of New Jersey on any future application.
3. The works, facilities, and/or activities shown by plans and/or other engineering data, which are on this day approved, subject to the conditions herewith established, shall be constructed and executed in conformity with such plans and/or engineering data and the said conditions.
4. No change in plans or specifications shall be made except with the prior written permission of the Department of Environmental Protection of the State of New Jersey.
5. The granting of this permit shall not be construed to in any way affect the title or ownership of property, and shall not make the Department of Environmental Protection or the State a party to any suit or question of ownership.
6. This permit does not waive the obtaining of Federal or other State or local government consent when necessary. This permit is not valid and no work shall be undertaken until such time as all other required approvals and permits have been obtained.
7. A copy of this permit shall be kept at the work site, and shall be exhibited upon request of any person.
8. In cases of conflict, the conditions of this permit shall supersede the plans and/or engineering

STREAM ENCROACHMENT PERMIT NO. 1412-02-0014.1 FHA020001

9. Limit and Extent of Approval

- a. This approval grants permission to the applicant and/or its agents to undertake an activity regulated by the State of New Jersey as described by the text of this permit and as detailed by the herein approved plans. Any construction, grading, removal of vegetation, or other activity at this site within or affecting a regulated flood plain, other than specifically approved by this permit or as detailed by the approved drawings, shall require additional approvals from the Department. The commencement of such regulated activities without the appropriate approvals shall be in violation of State law.
- b. All activities authorized by this permit shall be completed within five years of the issuance date as listed on the first page of this document. At that time, this approval, if not previously revoked, shall automatically become null and void, and none of the activities referenced herein may commence or continue until a new approval has been granted by the Department.

10. Method of Construction

- a. All activities approved by this permit shall be performed under the supervision and direction of a Professional Engineer licensed in the State of New Jersey, and shall be undertaken using the best management practices available. Furthermore, the site shall be subject to inspection at any time by representatives of the Department to ensure the continuous application of the provisions of this permit.
- b. During the course of construction, neither the applicant nor its agents shall cause or permit any unreasonable interference with the free flow of the stream by placing or dumping any materials, equipment, debris or structures within or adjacent to the stream corridor. Upon completion or abandonment of the work, the applicant and/or its agents shall remove and dispose of in a lawful manner all excess materials, equipment and debris from the stream corridor and adjacent lands.
- c. All activities authorized by this permit shall be stabilized in accordance with Standards for Soil Erosion and Sediment Control in New Jersey (obtainable from local Soil Conservation District Offices), or equal engineering specifications, to prevent eroded soil and sediment from entering adjacent waterways and wetlands at any time during and subsequent to construction. The Department reserves the right to order the suspension of any activity if unacceptable levels of erosion or turbidity result from the same. Furthermore, the applicant shall maintain the stream corridor as shown on the approved drawing/s for either such time as is required for the channel and/or banks to become reasonably stabilized, or for one year after completion of the project (as evidenced by a Certificate of Completion), whichever period of time is longer.

11. Responsibilities of Applicant

- a. The granting of this permit does not in any way relieve the applicant and/or its agents from the responsibility for damages caused by any construction or activities hereby approved, nor does the Department accept responsibility for any structural designs.
- b. No construction authorized by this permit may begin until the enclosed permit acceptance

STREAM ENCROACHMENT PERMIT NO. 1412-02-0014.1 FHA020001

form has been signed by the applicant and is returned to the Department. By signing and submitting this form, the applicant accepts this permit in its entirety and agrees to adhere to all of its terms and conditions. Please be advised that this permit may be declared null and void should it be determined that adequate measures had not been taken by the applicant and/or its agents to ensure the continuous implementation of these terms and conditions.

- c. Within ten (10) days of the receipt of this permit by the applicant, this permit shall be recorded in its entirety in the office of the County Clerk or the Registrar of Deeds and Mortgages for each county where this permit is located. Verified notice of this action shall be forwarded to the Department immediately thereafter.
 - ~~d. The enclosed construction notice shall be completed by the applicant or its agent and submitted to the Department at least fourteen (14) days prior to the commencement of the herein approved activities.~~
 - e. The enclosed completion report shall be completed by a Professional Engineer licensed in the State of New Jersey and submitted to the Department within thirty (30) days after completion of the herein approved activities.
12. From **November 15 through April 1** of each year, no work is permitted within the stream and stream banks to protect the wood turtle hibernating areas. During **April 1 to June 30** of each year, no work is permitted within the NJDEP jurisdictional areas to protect wood turtles. Construction activities during these restricted periods can be conducted for those areas that have been surveyed for the presence of turtles at an appropriate time of year and immediately prior to their containment within silt fence enclosures to prevent turtles from reentering the construction area. The proposed methods and timing of the survey and containment perimeter of the work areas will require review and concurrence by NJDEP prior to conducting work during the restricted periods.
13. The applicant must obtain a Freshwater Wetlands permit or Transition Area Waiver for the proposed construction within freshwater wetlands, wetland transition areas or State open waters on site, in accordance with N.J.A.C. 7:7A-1.1 et seq. from the Land Use Regulation Program. Specifically, a review of this project indicates that a Individual Freshwater Wetlands Permit shall be obtained prior to the construction of the proposed road widening within these areas.
14. The drawings hereby approved are ten (10) sheets prepared by HNTB Corporation, dated December 20, 2002, unrevised and entitled:

"STREAM ENCROACHMENT PERMIT PLAN ROUTE I-287 AT ROUTE 24 INTERCHANGE EASTBOUND RAMP CONTRACT NO. 038983760", sheets 3, 4, 6 of 13, dated April 11, 2003,
